

Monitoring options

Casa Security offers a range of monitoring options depending on your needs

Dialler Daily or weekly test signals to the monitoring station ensures any communication problems are dealt with quickly, if a test is not received you will be notified of the issue and if needed, we can arrange a fully qualified technician to attend to rectify the issue.

GSM A GSM unit can be installed as a back up to your dialer to ensure that if there is a problem with your phone line the signals will still be sent via the back up GSM unit. A GSM unit can also serve as the primary reporting method where no phone line exists.

GPRS monitoring Providing the most advanced technology, using the GPRS network for primary communication and frequent polling to ensure any tampering with communications is reported immediately. Securitel equivalent High Risk Back-up.

Why Casa Security?

We pride ourselves on our friendly and well trained staff to ensure your security needs are met. Our staff hold the required licences and are registered with the relevant state regulatory bodies for added peace of mind.

Casa Security can look after all your security needs from the supply and installation to monitoring and servicing making Casa the First Choice for Security.

Casa Security's monitoring staff are on hand 24 hours a day 7 days a week, and our service team can be contacted at any time in an emergency situation.

To find out more please contact our office on 9241 9000.

Please note: Not all systems can be monitored. To ensure we can provide monitoring, an inspection by one of our trained and qualified Technicians may be necessary.

Why do I need a Monitored Security System

How many times have you seen a strobe light flashing on a building or heard a siren sound? Have you ever reported the alarm? What if it was your business or home? Who would you reply on to action the alarm?

With Casa Security monitoring your security system you can be assured there is someone ready to action any breach from your alarm exactly the way you want it to be actioned.

Having a monitored alarm also means you can be notified of any technical problems as soon as they happen. This includes problems that you may not even be aware of - from low battery to test failure, we will contact you and assist you in resolving these problems.

What Events can be monitored?

- Burglary/Intruder Detection
- Duress/Medical assistance required
- Smoke/Fire Detection
- System not armed
- Restricted Access

Grade A1 Monitoring Benefits

The Grade A1 monitoring station has passed the high industry standards in monitoring. This ensures that any alarm activations are dealt with promptly according to your instructions.

The rating ensures that the monitoring station is built to standards and if the primary power supply should fail the alternative power supply will be available.

24 Hours a day seven days a week the monitoring station is staffed with our efficient and professionally trained staff.

How does the monitoring process work?

If the alarm has been activated, the monitoring station will be alerted to exactly which area has caused the activation and they will notify a keyholder.

If one sensor is activated, the monitoring station will contact the nominated keyholder starting at the top of the priority list until someone is notified of the situation.

If multiple activations occur then the monitoring station will immediately notify the appropriate emergency authorities and the nominated keyholder.

Local 24 Hour West Australian Grade A1 Monitoring Station

Holding the highest certification available in Australia, our Monitoring Station is ASIAL Grade A1 certified and is WA's Premier Security Monitoring Centre.

Monitoring Support
